Sessions

Trauma and the Brain

Presented by Dr. Lori Desautels

In this presentation, Dr. Desautels will share how adversity and trauma impact the developing brain and body, affecting cognition, behaviors, and relationships. She will also share the research of resiliency and how our brains and bodies repair and heal from trauma and adverse conditions. She will present the practices and strategies that are aligned with brain function and structure and can be implemented in our homes, schools and communities

Strategies for Developing Social-Emotional Skills for Preschoolers

Presented by SPARK

Discover practical strategies for promoting progress through social-emotional developmental milestones for success in your program. Learn how to support children with behavioral challenges. (CKC 1)

Self-Care on the Clock

What do you do to help regulate your own emotions while teaching? Explore engaging activities you can do with your children in the room designed to relieve stress and anxiety
